Radiheat[®]
Making the invisible work for you

COMFORT HEATER

SALIENT FEATURES

- Instant Heating - People
- Energy Efficient
- Eco-friendly
- Easy to Maintain
- Relatively Healthy

What Makes Radiheat Comfort Heater Extraordinary?

- Instant Heating**
 With the instant heating feature, infrared heaters do not require initial warming up. Thus these heaters provide adequate warmth from the moment that they are switched on.
- Energy Efficient**
 Compared to other heaters, infrared heaters are the most energy-efficient. With no heat being wasted, 100% of the heat generated gets used.
- Eco-friendly**
 Infrared heaters keep the air around you absolutely clean. With no components being added to its immediate environment, these forms of heaters are environmentally safe to use.
- Easy to Maintain**
 Infrared heaters are very easy to maintain. With no motor that can have wear and tear and air filters that might require periodical replacements, infrared heaters are a hassle-free investment. However, the reflectors of the heater need to be cleaned once in a while to keep it efficient.
- Relatively Healthy**
 IR heaters do not tamper with the amount of humidity or oxygen in a room, do not dry out your skin and/or sinuses as is the case with other forms of room heaters, making them comparatively healthy to use in your home. Studies have shown that it is also possible to promote healthier blood circulation by using electric infrared heaters. In short, an infrared heater gives all the health benefits that are associated with the sun's rays minus the UV exposure.
